# MUHAMMAD HAMIEZAN BIN ABD GHAFAR

81110, Johor Bahru, Johor • 011-2879-7086 • mhamiezan24@gmail.com

## SUMMARY

Computer Science graduate specializing in Network Computing, currently gaining hands-on experience through an internship focused on web development, bug fixing, and system testing. Expected to complete the internship on 3 January 2025, I am eager to step into a software development role where I can leverage my technical expertise, problem-solving skills, and passion for innovation to contribute to meaningful projects.

## WORK EXPERIENCE

**IT Intern, RN Technologies Sdn. Bhd.**                    **September 2024 - Present**

- Developed and maintained system modules for both frontend and backend, using technologies such as Laravel and Bootstrap, enhancing application performance and user experience.
- Fixed system bugs according to design specifications, improving the user interface consistency and usability.

## PROJECT

**RGreement, Final Year Project**                    **Dec 2023 - July 2024**

- Designed and developed a comprehensive rental house finder web application facilitating searching, signing, and paying deposits through blockchain.
- Built the frontend with React.js, backend with Laravel API, and implemented smart contracts using Solidity.
- Utilized smart contract features in blockchain technology to store rental contracts and deposits, ensuring transparency and security.

**NASH Cafe Ordering System Mobile Application**                    **June 2024 - July 2024**

- Design and developed a cafe ordering system mobile application for administrators and customers with PayPal payment integration.
- Developed Android application using Flutter framework and created a separate backend API using Laravel to support efficient system operations.

**NASH Cafe Ordering System Website**                    **Nov 2023 - Jan 2024**

- Designed and developed a café ordering system website for administrators, staff, and customers with Stripe payment integration.
- Built the web application using the Laravel framework and MySQL database.
- Integrated Google Maps API to help users locate and navigate to nearby branches.

## EDUCATION

**Bachelor of Computer Science in Netcentric Computing**                    **Sep 2021 - Present**

Universiti Teknologi MARA (UiTM) Melaka – Kampus Jasin

- Expected to graduate by February 2025
- CGPA: 3.33

**Foundation in Engineering**                    **June 2020 - May 2021**

Universiti Teknologi MARA (UiTM) Selangor – Kampus Dengkil

- CGPA: 3.78
- MUET Band 4

# PARTICIPATION

### i - JaMCSIIX 2024 <span>August 2024</span>

Bronze Medalist
- Participated in exhibition to showcase project that is innovative and related to computer science invention
- Submitted an extended abstract and video explaining the product usefulness and demo
- Demonstrated the project's capabilities and practical applications on how it can be use to contribute to the society

### All About ICT <span>May 2024</span>

Vice Project Manager
- Encouraging the use of ICT among primary school student and exposing great ways to properly utilized the technology.
- Collaborated with cross-functional teams, responsible for balance work distribution.

### rAKSASA iCTF by rawSEC <span>Oct 2023</span>

Participants
- Successfully secured 30th place out of 130 competing teams in a highly competitive capture-the-flag cybersecurity competition.
- Demonstrated strong problem-solving skills and advanced knowledge in cybersecurity, cryptography, and network security.

---

# SKILLS

- **Programming/Markup languages:** PHP, HTML, CSS, Javascript, Dart, Java, C++
- **Languages:** English, Malay
- **Version Control:** Github, Gitlab
- **Databases:** Firebase Firestore, MySQL
- **Tools:** Git, VMware, MobaXTerm
- **Proficient Frameworks :** Laravel, React JS, Flutter, Bootstrap
- **Awards/Activities**: Received the "Best Project" Award for outstanding contributions to project innovation, Rgreement, Final Year Project Exhibition.
